

BACKGROUND

Africa's research landscape is vibrant yet African scholarship remains structurally under-represented in global knowledge systems. Limited training in research writing, scientific communication, peer-review processes, and translation of scientific evidence into policy means that high-quality, Africa-generated evidence rarely reaches the audiences it could influence. The ARIN Publishing Academy is ARIN's response: a pan-African, Africa-led programme designed to strengthen the full research-to-impact pipeline.

Delivered over three months using a blended, flexible model: live webinars, self-paced e-learning, mentorship clinics, peer-review circles, and practical writing labs, designed for working professionals and early-career researchers across all African time zones.

OBJECTIVES

- Strengthen research writing and publishing capacity to enable high-quality academic, technical, and policy outputs.
- Build inclusive mentorship networks linking participants with senior scholars, editors, reviewers, and policy communication experts.
- Enhance data literacy and research rigour through training in data management, analysis, visualisation, and ethical practices.
- Advance knowledge translation, transforming evidence into policy briefs, op-eds, technical notes, and advocacy materials.
- Promote open dissemination using digital tools, open-access models, AI, and structured publishing workflows.

TRAINING CURRICULUM: 7 MODULES

M1 Academic Writing Mastery

Research design alignment, manuscript preparation, argument development, journal selection.

M3 Research Impact and Open Science

Open-access publishing, research metrics, citation strategies, global visibility.

M5 Ethical Publishing and Research Integrity

Plagiarism prevention, data transparency, responsible authorship, ethical conduct.

M7 Linking Research to the SDGs

Aligning research with SDG goals, articulating development relevance, framing evidence for policy uptake and donor reporting.

M2 Navigating the Publishing Process

Peer review response, editorial feedback, managing revisions, avoiding predatory journals.

M4 Science Communication for Policy

Writing policy briefs, media engagement, storytelling, non-academic audiences.

M6 Responsible AI in Academic Writing

Ethical and transparent AI use, disclosure requirements, bias awareness, alignment with journal policies.

What You Gain

- ◆ Formal certification upon module completion
- ◆ Mentorship access: editors, reviewers, and senior scholars
- ◆ Linkages to fellowships, funding calls, and special journal issues
- ◆ Alumni network, co-authorship, and publication opportunities

ACADEMY TEAM

Board Members

Dr. Joanes Atela
Prof. Idil Boran
Dr. J.P. Ochieng Odera
Prof. Dawn Bazley
Prof. George Krhoda

Publishing Partner

Taylor & Francis Group

Coordinator

Florence Onyango

Trainers

Dr. Francis Oloo
(Lead Coordinator)
Dr. Eurallyah Akinyi
Dr. Maureen Ngesa
Dr. Fiona Ngarachu

Support Team
